

Whole herd  
Johne's testing  
once, twice or  
three times  
a year

If you are looking for straightforward whole herd Johne's testing once, twice or three times a year, with the ability to track your cows results and someone to remind you when your next test is due with NMR, it's as easy as...

## Johne's

1 2 3

Working with your vet, simply choose the service to suit the frequency of testing needed in your herd and you'll receive...

- Reminders when your testing is due
- Fully sortable results, collated by Sample ID displayed on Herd Companion
- Average Test Values

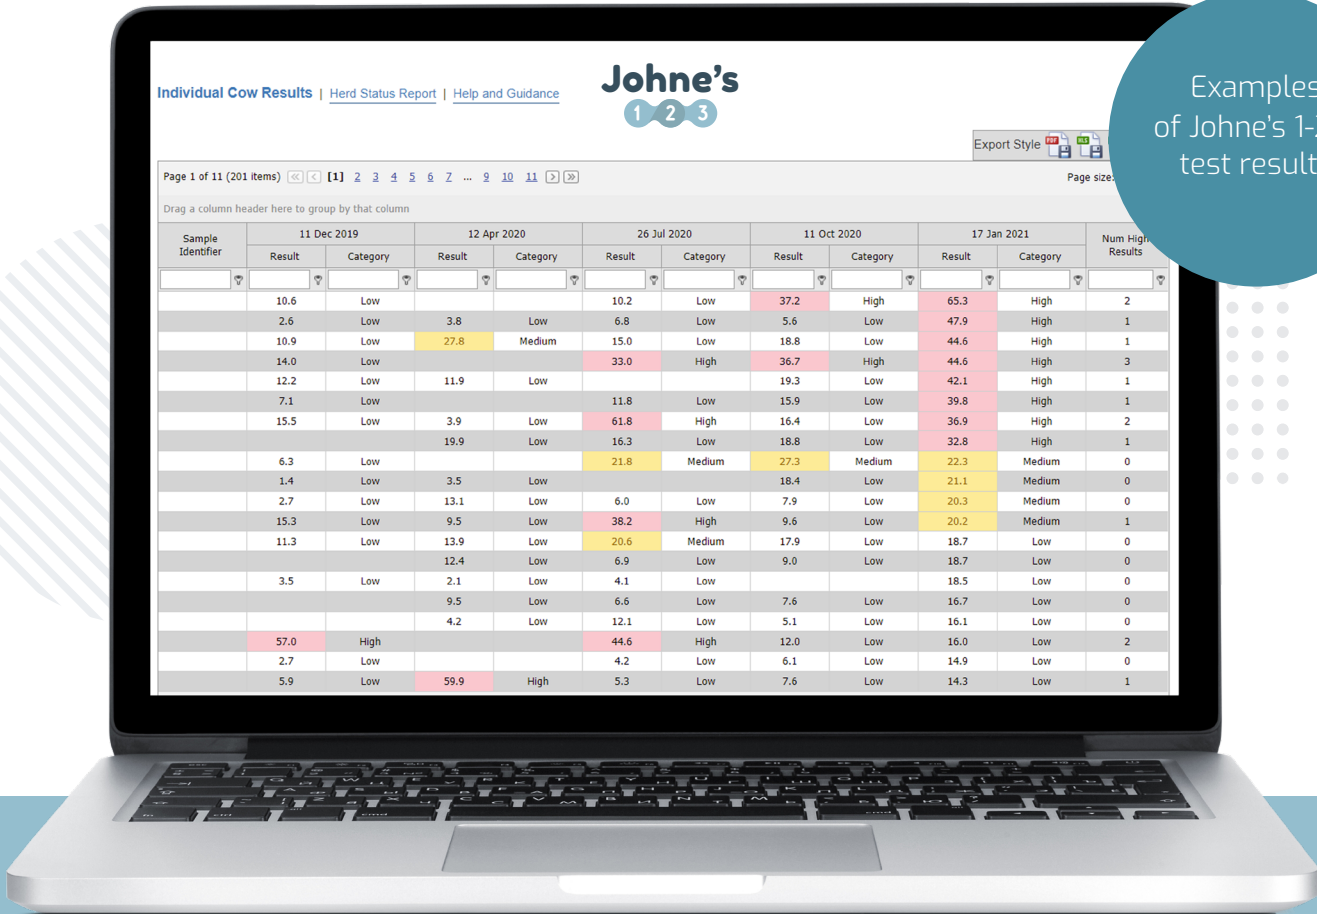

And don't forget, if you need that extra step of a full quarterly testing service with risk categorisation of your cows, we have our HerdWise service to aid your Johne's management.

For more information please call the  
NMR Customer Services Team on

or visit [www.nmr.co.uk](http://www.nmr.co.uk)

Examples of Johne's 1-2-3 test results

All results are displayed using the sample ID submitted to the laboratory. **It is strongly advised that you use consistent sample IDs for each round of testing and do not reuse line numbers as this could lead to results being attributed to the wrong animal.**

Results are categorised into Low, Medium and High. Medium and High results are also highlighted in Yellow and Red for ease of identification.

Results can be sorted using any of the available columns and can be exported into XLS, CSV and PDF formats.

### Johne's Testing Results

Individual Cow Results | [Herd Status Report](#) | [Help and Guidance](#)

Displays aggregate data for all testing carried out within the last 5 years.

Columns show the number and percentage of high results at each test along with, the number of animals with antibody results greater than 60 and 100 to show progress in disease management.

Also displayed is the Average Test Value progress tracker, which is now part of the National Johne's Management Plan (launched July 2021).
